Dear Dune Temporary Tattoos,

What a fabulous product you have created in providing temporary nipple tattoos for breast cancer patients. As a volunteer advocacy group comprised of all breast cancer survivors we mentor women at Mayo Breast Clinic, Jacksonville, Florida, as well as others in the community. We know that so many women after a mastectomy and reconstruction are completely worn out from numerous other procedures. A permanent tattoo is a very "iffy" decision – many never commit to something they can never change. Additionally, permanent tattoos have to constantly be "touched up". Your temporary tattoos solve a multitude of issues for these women, and we have found your temporary tattoos bring an instant, extremely positive reaction for everyone who uses them – they feel normal again. Your talents and your product will be changing women's lives for many years to come.

Our deepest gratitude,

Laura P. Bergmann, Chair
